

Featherweight Service

Basic Service: \$69

Should be done periodically based on how heavily your use is. Basic Service includes the following:

- Open covers and clean out lint as necessary
- Inspect wiring for damage
- Inspect motor brushes for replacement and advise (replacing brushes will take at least a week to obtain parts, but no extra labor charge)
- Inspect motor commutator for need of motor service
- Lubricate motor
- Remove congealed grease from gear train and re-lubricate
- Check and adjust timing
- Lubricate all linkages and bearings
- Test sew

Advanced Service: \$169

Should only need to be done once in the lifetime of the machine, regardless of how heavily it is used. If it has not been used in ages, might need to take up to two weeks while internal bearing surfaces are re-saturated with lubricant over several days and then excess is removed.

- Basic service included
- Remove light assembly and clean lead oxide from lead protection tube, gear train and surrounding areas
- Remove motor, disassemble and clean commutator of baked on grease. Inspect for any problems.

Other Services: \$60 per hour and cost of materials

With these services, the customer will be provided with an estimate before any work is begun, which would include all parts cost.

- Replace oil drip pad
- Case repair & cosmetic "tune-up"
- Custom bottom pad creation in case (these are usually missing)
- Foot pedal adjustment
- "Re-animation" of old non-working machines
- Missing/broken part replacement (most internal parts are commonly available, but must be ordered)
